# PUBLIC MEETINGS, NOTICES & OPINIONS

Castle Valley Drive will close for approximately 60 days starting Monday, January 26, for a culvert replacement project.

The road will be closed 24/7 at Rimrock and at 394 Castle Valley Drive while crews remove the existing culvert and install a large-capacity arch culvert. The town of Castle Valley secured federal grant funding for the project, which addresses a failing culvert.

#### Detour

Traffic will be routed up Castleton Road to Fire Station 1 (at the cattle guard), through the connector to Shafer Lane, then back up Shafer Lane to Castle Valley Drive. Drivers should obey the 15 mph speed limit on Shafer Lane.

#### Vehicle Restrictions

Due to road angles, culvert and cattle guard weight capacities, an overhead lines through the Shafer connector, the detour has the following limits:

- 35-foot trailer length limit
- 14.6-foot height limit
- No vehicles or trailers over 20 tons
- No cement trucks or trucks hauling heavy equipment.

Exceptions may be considered with a Sheriff escort through the Shafer connector. Contact Castle Valley Road Manager Dorje Honer at [dorjeh@castlevalleyutah.com](mailto:dorjeh@castlevalleyutah.com) or (385) 228-0600.

The Town will post weekly updates via email, the Town website, and the Castle Valley Facebook Community page. Questions or concerns can be directed to the Town Clerk at [townclerk@castlevalleyutah.com](mailto:townclerk@castlevalleyutah.com) or (435) 259-9828.

#### To the Editor:

Since 2005 I have followed the Moab UMTRA Project, and although I now live in Ohio, I remain engaged because I firmly believe transparency and accountability in federally funded projects impact every taxpayer.

The Department of Energy (DOE) recently celebrated the relocation of sixteen million tons of residual radioactive material (RRM) to Crescent Junction. This milestone deserves recognition.

However, the project has now been appropriated \$74 million for fiscal year 2026, up from the recent \$67 million appropriated during full-scale removal of close to a million tons of RRM per fiscal year. With the tailings removed, the remaining work consists of the removal of an undetermined volume of tons below the "pile", followed by long-term groundwater remediation involving millions of gallons of contaminated water beneath the former site. Yet there is still no publicly available, detailed budget explaining how this \$74 million will be spent.

Breaking down this enormous \$74 million appropriation becomes even more striking. Using a five-day workweek and subtracting the eleven federal holidays, DOE has roughly 249 employee working days in the fiscal year—knowing full well that if pump-and-treat methods are used, groundwater pumping will more than likely operate 24/7/365. That means the project is now burning through approximately \$297,000 every employee workday, with no clear public explanation of how those funds are allocated.

DOE contractors are required to maintain financial records in an approved Work Breakdown Structure (WBS) format, yet FOIA requests for this information are consistently denied.

If this reporting is required, who receives it, where is it reviewed, and why can't taxpayers see the same information DOE relies on internally?

Taxpayers deserve clarity. Transparency is the foundation of trust.

Sincerely,

Michael Adkison
